

# Addu Equatorial Hospital

## Follow Our journey!

Addu Equatorial Hospital is committed to provide effective patient care.

## Why choose us?

### AEH is committed to provide effective patient care

AEH is committed to transform the way healthcare is delivered in Maldives. We focus on practice of evidence-based medicine, strict infection control & efficient and effective cross functional communication.

It is proven that medical care is most effective when:

- It is individualised
- Appropriate medical technology is used
- Collaborated care is delivered.

Patients who chose to review at AEH recommends AEH to others because they believe **AEH-one team** can restore their health to normal or can optimise

In Maldives there is no healthcare facility that can be considered as an exceptionally good care provider. At AEH, we are committed to take healthcare delivery to next level in Maldives.

**“AEH is committed to provide value-based patient care”**

In Maldives, general perception of people is that only Hospitals in Male' can provide good medical care and has best doctors. However, this is not always true. Therefore, it is important for patients and caregivers to find out and evaluate the overall approach, expertise and facilities offered by each hospital.

## Patient & family centred care

We encourage our staff to make to provide patient and family centred care. We continuously train our staff to make them understand the importance of good communication and compassion when providing healthcare.

## Patient care

We give high priority for infection control. We have protocols and policies in place to ensure that patient is cared in a safe environment. Sometimes relatives and other visitors see our patient safety protocols and policies as inconveniences. However, we see them as keys to successful recovery of patients and hence we refuse to compromise.

## What is AEH clinical care teams' culture?

Don't start a treatment without an accurate diagnosis. After establishing an accurate diagnosis, provide collaborative care so that patient gets optimal care that cures or keeps the disease process well controlled.

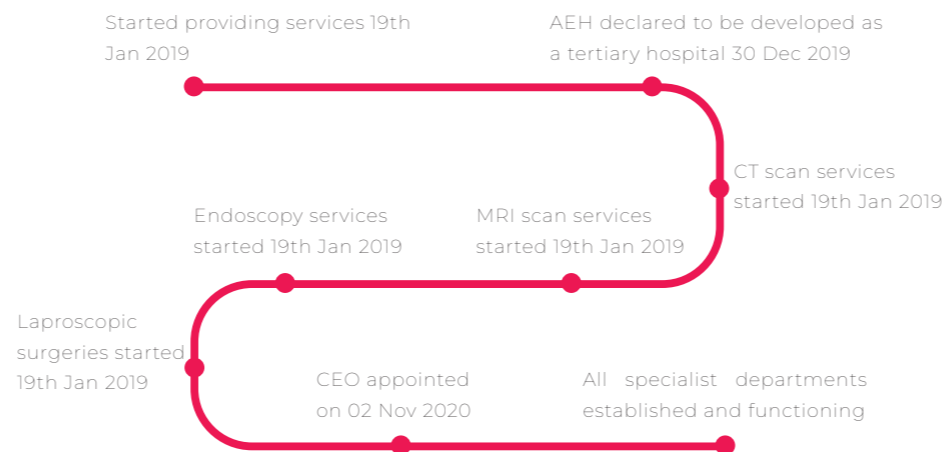

**"We are there, when you or your loved ones need care"**

At AEH we try to recruit and retain competent healthcare providers, especially doctors and nurses. We believe that that only timely care by competent care providers can guarantee best outcome for the patients.
